Wall Street Journal (published 6/25/21) – [Congress Restores Pre-Trump Era Methane-Gas Emissions Standards](#)

Major oil and gas producers— [Royal Dutch Shell PLC](#), [Exxon Mobil Corp.](#), [BP PLC](#)—said they support methane regulations as they face pressure from investors on climate issues. The costs of the methane restrictions reimposed by Congress will weigh more heavily on smaller operators, industry officials said.

“Keeping methane in the pipes is good for the planet and for business,” said Mary Streett, senior vice president of BP’s U.S. communications & advocacy. “It means that we can sell it as a cleaner fuel source rather than losing it.”

Associated Press (published 6/25/21) – [Congress acts to reinstate methane rules loosened by Trump](#)

Oil giant BP said it supports direct federal regulation of methane emissions.

“Keeping methane in the pipes is good for the planet and for business. It means that we can sell it as a cleaner fuel source rather than losing it,” said Mary Streett, a senior vice president at BP. “We’re pleased that Congress recognizes the importance of this objective and we encourage the president to sign the resolution,” she said.

Politico (published 6/25/21) – [Congress erases Trump methane rollback](#)

"BP supports the direct federal regulation of methane from new and existing sources across the value chain," said Mary Streett, senior vice president of communications with the company, in a statement. "We're pleased that Congress recognizes the importance of this objective, and we encourage the president to sign the resolution."

Washington Post (updated 6/25/21) – [As Democrats spar over advancing Biden's climate agenda, they move to cut methane](#)

But the industry itself was split over the decision to scrap federal safeguard on methane. Some large companies, such as BP, said the EPA should regulate methane emissions to protect the environment and create a level playing field.

New York Times (published 6/25/21) – [House votes to restore Obama-era regulations on methane](#)

Large companies like Shell, BP and the Exxon Mobil Corp. all opposed Mr. Trump's rollback in 2020, noting they were working to reduce emissions. Many said they worried that if methane is not controlled it could undermine public and political support for natural gas.

National Public Radio (updated 6/25/21) - [Congress Votes To Restore Regulations On Methane Emissions](#)

"We cannot make the climate case for the widespread use of natural gas if we don't manage and contain it," Shell U.S. President Gretchen Watkins said in a statement to NPR. Other large oil companies expressed similar views on Twitter, including [BP](#), [Equinor](#) and [Total](#).

The Hill (published 7/5/21) – [Focus shifts to EPA on methane regulation after Biden action](#)

Some companies are also indicating they'd be open to further regulation, with a BP spokesperson saying that the company "supports the direct federal regulation of methane from new and existing sources."

E&E News (published 6/25/21) – [Congress kills Trump methane rollback](#)

BP PLC, one of multiple oil and gas companies to back the resolution, urged Biden to sign it. "Regulating methane helps ensure all companies prioritize reducing methane emissions in their operations," said Mary Streett, senior vice president of BP communications and advocacy for the Americas, in a statement. "Keeping methane in the pipes is good for the planet and for business. It means that we can sell it as a cleaner fuel source rather than losing it," she said.

IHS Markit (published 6/25/21) – [Trump-era methane regulations one step from rescission after US House vote](#)

BP America immediately issued a statement in favor of the congressional resolution, saying the company supports "the direct federal regulation of methane from new and existing sources across the value chain."

"Keeping methane in the pipes is good for the planet and for business. It means that we can sell it as a cleaner fuel source rather than losing it," Mary Streett, senior vice president of bp communications & advocacy Americas, wrote.
