CCS Plants 3oA (Gen-Pop)

Plants capture CO₂.

What if we could help industrial plants capture it too?

Think how we could help lower emissions.

More and more scientists think Carbon Capture is key to reducing CO₂ emissions globally.

It's one way ExxonMobil is helping industrial plants...be more like plants.

ExxonMobil

CCS Plants 3oB (Opinion Leaders)

The world needs energy – but it also needs to lower emissions. ExxonMobil believes that Carbon Capture technologies are one way to help lower global CO₂ emissions—and more and more scientists agree.

As a leader in capturing carbon in its own operations, ExxonMobil is working to make this technology more efficient and affordable for other industries as well.

That's the Unexpected Energy of ExxonMobil.
