Subject: Urgent IMWG request - Air Quality
[IMWG Sep 2015 Air Quality Background Paper.docx](#)
[IMWG Air Quality Final BP Position.docx](#)
[smime.p7s](#)

All

Building on the discussions some of you have had with Anthony and Tyrone and team we have a bit of an urgent need to work on updating the IMWG position and background papers on air quality for submission for the September IMWG meeting. The last air quality papers were developed in 2016 (attached).

David Eyton has requested that we prioritise this to reflect the potential impact of the various air quality issues and potential technology advancements linked with transportation (engines and emission controls),

Redacted - First Amendment

Redacted - First Amendment

air quality needs and understanding.

We suggest that the scope for this update should be focussed on 2 main themes:

- Road transportation / vehicle (main issues and technological options linked with air quality improvements and un-intended consequences/ trade offs e.g. CO2 vs N2O etc)

Redacted - First Amendment

The draft update needs to be submitted to the IMWG secretariat by August 31st it allows us just under 6 weeks to get technical input from your teams who are the most critical contributors and then finalize. As I am in transition to my new role I propose that Tyrone and Michelle will help me with coordinating your technical input.

Request: please can you review the timeline and advise if you and your teams can contribute to this update as proposed & if not propose an alternative solution.

- Request for specific technical input by contributing teams – 17th July
- Technical feedback received by – 8th August.
- Tyrone, Michelle to coordinate feedback into background paper and position paper – 9th – 17th Aug
- Send to SMEs – 20th – 23rd Aug
- Initial Leadership review and Legal review – 20th Aug
- Consolidation of review feedback – 24th Aug
- Leadership reviews to finalize – 27th Aug
- Incorporate changes and submit to IMWG secretariat. 29th Aug

Many thanks

Liz
