A carbon tax is a proven means to raise large sums of much-needed revenue while lowering #CarbonEmissions.

By embracing a carbon tax, Biden could help restore America's infrastructure, fiscal strength & leadership, write Hank Paulson & @ErskineBowles.

Opinion | Biden should embrace a carbon tax
Putting a price on carbon would advance America's leadership role in the world.

Subject: Paulson, Bowles oped on carbon tax

Good afternoon,

I have attached my latest op-ed published today in the Washington Post, co-authored with Erskine Bowles. We argue that President Biden should embrace a carbon tax, and that doing so would help finance America's infrastructure in a way which bolsters its fiscal strength with a powerful, efficient incentive to reduce carbon emissions, while also allowing us to provide strong global leadership on climate finance.

I welcome your thoughts and feedback.

Best,

Hank
