Subject: Thanks for your interest in CCL

Bob,

Thank you for agreeing to participate in the oil and gas session of Citizens Climate Lobby's 2020 conference on June 10. Your presence, representing the policy side, will nicely balance the other, more technical speakers.

I will arrange a practice call about a week before the conference session. Do you have any preferred days or times?

Best wishes,
Charles Gabrys

Ms. Williams,

I was just asked to participate in a conference call at 2pm tomorrow, May 12, after agreeing to talk with Mr. Stout at that time. Does Mr. Stout have any other time tomorrow that is open? If not, I can keep my 2pm time with him.

Sorry to be a pest -
Charles Gabrys

Ms. Williams:

Mr. Stout asked me to arrange a time this week for a phone call at which to discuss his possible appearance at a conference session. For me, Tuesday is open all day, and Thursday is my second choice.

Thanks,
Charles Gabrys

Hi Charles. Thanks for your note, and also for your participation in (and kind words about) the Future 500 session.

Redacted - First Amendment

To that end, can we set up a 30 minute call sometime this week to discuss? My assistant Tara Williams can help set this up.

Best,

Bob Stout

Subject: Conference invitation -- oil & gas panel on June 10

Mr. Stout,

David Lyon, a scientist at EDF, recommended you to be a panelist in an oil and gas session at Citizens Climate Lobby's 2020 annual conference (online this year) on June 10 at 8pm ET. We would be grateful if you could spare an hour to present BP's new goal of net-zero carbon emissions by 2050 and engage in discussion with our other two panelists, David himself and a petroleum geologist. David and EDF, as you must know, have documented methane leaks from U.S. oil and gas infrastructure, and our geologist has prepared an easy-to-understand explanation of the need to continue using petroleum and especially natural gas well into the energy transition.

Redacted - First Amendment

I heard your session at the Future 500 Summit at EarthX, where you gave a very effective explanation of BP's current path forward. If I can answer any questions about CCL or the panel that we are organizing, I would be happy to respond.

Thanks,

Charles Gabrys
