IETA Symposium on Section 115 of the Clean Air Act

Dear David,

In January 2016, a consortium of law professors released a report titled, "[Legal Pathways to Reducing Greenhouse Gas Emissions under Section 115](#)". In the report, the authors conclude that the Paris climate agreement "provides a strong basis" for EPA to invoke Section 115 of the Clean Air Act "to establish an economy-wide, market-based approach for reducing GHG emissions." At this symposium, Michael Burger (the report's lead author) will outline the report's analysis and provide his views on how the yet-to-be-used Section 115 of

BPA_HCOR_00283589

the Act could be utilized. Following his presentation, we will host a roundtable discussion to further flesh out the possibilities that may or may not be embedded in Section 115.

Symposium Details

April 13
2:30-5:30 p.m.

Latham & Watkins

Seating is limited

Legal Pathways to Reducing Greenhouse Gas Emissions under Section 115

Michael Burger, Executive Director of the Sabin Center for Climate Change Law at Columbia Law School, provides an overview of the report's analysis that Section 115 provides EPA the authority and flexibility necessary to design an economy-wide climate change program that maximizes efficacy and how the Paris Agreement paves the path for utilizing these provisions.

Roundtable Discussion

Dirk Forrister, president and chief executive of the International Emissions Trading Association (IETA), will moderate a roundtable discussion among guests and IETA members on the legal, policy, and political questions arising from this analysis.

Participants:

Bob Wyman, Latham & Watkins

Cameron Prell, Crowell & Moring

Richard Saines, Baker McKenzie

Scott Weaver, AEP

Bill Tyndall, Center for Clean Air Policy
