I thought for CERA we might want to have grid reliability as it is an insider's conference and folks might get questions about it. But don't feel strongly about it. Same with well control rule.

Sorry – am literally working on the document now.

These are right but others also in the current draft are:

Trade (eg steel tariffs)  
ANWR  
Grid Reliability/Natural Gas  
Well Control rule (but not sure and would need to develop a draft – may want to leave that out for now)
