Subject: Actions & Notes from Upstream Carbon Steering Team Meeting - 6th December 2018

Team

The agreed actions from the Upstream Carbon Steering Team Meeting on the 6th December were;

Actions

- Carbon abatement fund FM and draft governance process to be shared with Gordon (**Rob Cooper**, *Complete and the FM is now with Gordon and will be shared with UET during the January UEM*).
- Consider a new name for the Carbon Abatement Fund (**Dave King**, January 2018)
- Consider discussion on ETAP power from shore at next Shell meeting (**Ariel Flores**, January 2019)

Redacted - First Amendment

- Results of February GPO projects review to be discussed at Carbon Steering Meeting (**Russell Smith**, 1Q 2019)

Other notes:

- **Tortue Phase 2:** Gordon raised a question to understand the reasons why electrification is not part of base case - decision on whether it can be included in base case expected in January. Option was offered for Gordon to meet with GPO team to review details in January.
- **Clair power from shore:** update to be provided to the steering meeting by end of February
- **GOO Flaring policy:** new practice when taken into account from project design will help reduce start up emissions

Redacted - First Amendment

- **ETAP Power from shore:** study complete, power from Norway most favourable option, most likely connection to Ula based on a project already underway to electrify Ula. Partners included in scope mainly Shell and Total.
- **Carbon abatement fund:** broad alignment to support - scope will be direct operated emissions only (Scope 1).
- **Upstream carbon workshop:** to be planned for the same week as the Group workshop (April 2019). Karen RagoonananJalim (new Upstream Carbon Manager) leading – action already in tracker.

Thanks

Dave
