Subject: Conference: Climate Change Implementation - Friday, May. 6

Join us at Stanford for "Setting the Climate Agenda for the next U.S. President," a conference to be held Friday May 6, 2016.

Setting the Climate Agenda for the next U.S. President

Regardless of who wins the election in November, our next President will need to confront the reality of climate change. This conference will highlight strategies the next President might employ to reduce greenhouse gas emissions and accelerate the United States' pivot to a clean energy economy. The conference also will address difficult "governance" issues, including how the new President might structure the White House and Cabinet to implement climate change programs that cut across jurisdictional lines, and how to effectively partner with private sector innovators and investors.

Friday, May 6, 2016

8:45 a.m. to 4:30 p.m.

Paul Brest Hall, Stanford University
