Please see attached for talkers on today's pull-out from the Paris Climate Accord. Use and share as you see fit, and please do flood the zone with public communications of support--TV, radio, social media, statements, op-eds, etc. The climate-change supporters will be out there trashing this move, so we'd love as much back-up for the President as possible. Please do flag for me the things you do, so I could share with folks around the White House. Many thanks....

Paul Teller
