

September 27, 2017

A meeting of the Public Issues and Contributions Committee was held on Wednesday, September 27, 2017 at 5:10 p.m., on the ExxonMobil Aircraft in route to New Jersey, pursuant to prior notice.

Present were Susan K. Avery, Michael J. Boskin, Angela F. Braly and Steven S Reinemund.

Also present, by invitation, was Henrietta N. Fore.

Dr. Boskin, Chair, presided, and Jeffrey J. Woodbury, Secretary, recorded the proceedings.

[REDACTED]

The meeting was held to document that members of the Committee and the invited guest would be visiting ExxonMobil's Clinton Lab Facility. The visit included a tour of the labs featuring ExxonMobil algae and fuel cell research; the advanced mass spectrometer; and the industry's only helium ion microscope. Directors would also visit a pilot plant that is assessing the feasibility of a new moving bed reactor technology. The visit included off sight engagement with community representatives, and visiting with employees at the Clinton facility.
