

Via Email, [REDACTED]@npc.org

Mr. Nichols,

This email is in response to Mr. Rex W. Tillerson's letter dated August 25, 2016 requesting ideas for topics on which the National Petroleum Council's insights might uniquely inform public policy decision-making for the future.

I am a strong believer that the depth and breadth of our nation's energy infrastructure will either enhance or limit our success in energy production, and also impact our ability to develop energy in the safest, most efficient manner. With that, I submit the following ideas for your consideration:

- Streamlining of the federal permit process for the development of pipeline easements and construction
- Streamlining of the federal permit process for the development of liquid natural gas export facilities

Please do not hesitate to reach out to my office with any questions.

Sincerely,

Christi Craddick
